WORK EXPERIENCE:

Trainee Web developer, Indegene life systems, Bangalore Oct 15 - Now

- Working as Trainee web developer in indogene life systems. Main work revolves around learning new web technologies and building web pages,RTE And Emailers.

Technologies Used: HTML5, CSS3, Javascript,Jquery, Responsive Design,Bootstrap.

PROJECTS:

- Medical CRM: Built a basic CRM web application in order to suit my brother's medical shop needs. it contains features like adding medicine, updating the stock and their prices etc. See more details at https://github.com/prem1806/medical_crm/

Technologies Used:python,flask,html,css,JavaScript,sqlite

- Optimal service pricing for cloud cache: Cloud applications that offer data management services are emerging. Such clouds support caching of data in order to provide quality query services. The users can query the cloud data, paying the price for the infrastructure they use. Cloud management necessitates an economy that manages the service of multiple users in an efficient, but also, resource economic way that allows for cloud profit.Naturally, the maximization of cloud profit given some guarantees for user satisfaction presumes an appropriate price demand model that enables optimal pricing of query services.

Technologies Used: Asp.Net with C#, SQL
